BE PART OF THE CHANGE

At Belda Lloréns we are pioneers in sustainable yarns, with a practically zero climate footprint, carbon neutral and working in regenerative products.

With more than 65 years of experience and 65,000 m2 of factory, we are at the forefront of innovation, being leaders in the sector within the Open End spinning, and with a production capacity of 150,000 kg per week in fine yarns.

ECOLIFE YARNS is our flag, a range of sustainable products that has become a philosophy of life, and that has made us advance to be able to offer a 360° service in sustainability in the textile sector.

Between different lots may be a slight variation in colors.

ECOLIFE products may contain 1-3% "other fibers" due to the recycled nature of the raw materials. As a result, very minor color contamination may occur.
